**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

The remarks filed on 23 November 2004 have been entered.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Schug (US 4,959,587).

Regarding claim 8, Schug ('587) teaches in figure 1 a double-ended arc discharge tube that, during manufacture, has a sealed electrode (32) and an open capillary channel (no number) at each end of the arc discharge tube.

Regarding claim 9, Schug ('587) teaches each end of the arc discharge tube has two of the capillary channels.

Claims 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Wyner et al. (US 5,343,117).

Regarding claim 8, Wyner ('117) teaches in figures 1, 2, and 4 a double-ended arc discharge tube that, during manufacture, has a sealed electrode (26) and an open capillary channel (40, 42) at each end of the arc discharge tube.

Regarding claim 9, Schug ('587) teaches each end of the arc discharge tube has two of the capillary channels.

### ***Response to Arguments***

2. Applicant's arguments filed 23 November 2004 have been fully considered but they are not persuasive.

The Applicant appears to be claiming an intermediate product, and not the final structure, of a discharge lamp. From this interpretation, the Examiner respectfully disagrees with the Applicant that neither the Schug ('587) or Wyner ('117) references anticipate claims 8 and 9.

At some point during the manufacturing process both Schug and Wyner a double-ended arc discharge tube having a sealed electrode and an open capillary channel.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2879

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
